

**One Part Oasis Transport Tray
One Part Basic Needs Kit**

THE PERFECT MIX

Basic Needs Kits bring you the lean benefits of standardization, reduced product handling and one-catalog-number convenience.

Cygnus Custom Basic Needs Kits are built just the way you want them, with just the products you specify. Building routine items into custom endoscopy kits with one catalog number reduces the number of supply touch points for better supply efficiency.

- **Transport pads that arrive inside of an endoscopy kit are missing half the battle. Literally.**
- **Flexible endoscopes must be transported in a closed container whether they are clean or soiled.**
- **Oasis Transport Trays protect the scope from start to finish.**
