

# Has your facility been cited for improperly handling soiled instruments?

- Walking non-containerized instruments to the soiled utility room.
- Transporting clean instruments in a red container.
- Transporting instruments in bowls/trays without lids or covered with a towel.
- Using trays without a biohazard label.

**Instead, safely transport soiled and clean instruments:**

- Eliminates the risk of citation.
- Provides secure tamper-proof containment of soiled surgical instruments.
- Compatible biohazard and clean sticker labels available.
- Protects delicate instruments and peel pouches from damage.
- Steam sterilization compatible.

*See page 2 for ordering information.*
