

Scope Transport and Protection

Single-Use Rigid Containment

Lapses in the cleaning of reusable endoscope transport trays can lead to cross-contamination in the surgical work area. Bedside cleaning is performed within the Oasis Tray, keeping residual run-off clearly differentiated clean and soiled scopes. The Oasis Scope Transport Tray offers an economical single-use alternative that protects both patients and staff from contamination and infection.

Oasis and Oasis PLUS Trays are Latex-Free.

All Oasis Trays are biodegradable. All lids are reversible (clean/soiled).

Single-Use and disposable.

Made of a biodegradable plant-based material.

Space efficient, stackable and nestable.

Introducing Oasis OT1530

Meet the latest addition to the Oasis® family of products. As an alternative option to the OP1330 Transport Tray, it also provides greater interior space for larger flexible endoscopes and probes. As with all Oasis Trays, OT1530 is eco-friendly and constructed using a renewable fiber that is biodegradable. The reversible lid communicates the condition of the scope as it transitions from clean to soiled.

- **Single-Use and Latex-Free.**
- **Made of a Plant-Based Renewable Resource.**
- **Space-Efficient, Stackable, and Nestable.**
